

## B6 CERAMIC TIRE DRESSING

### Available Sizes:

### Description:

This oil-based ceramic tire dressing creates a high-performance protective layer on the tire surface that guards against UV radiation, oxidation, and cracking. B6 compare with B1 offers longer-lasting gloss and superior hydrophobic properties, while also withstanding reducing damage from acid rain and dirt. It helps prevent ageing and hardening, delivering up to 3 months of durable protection.

### PH:7

### Ingredients:

Eco-solvent, polydimethoxane, antioxidant

### Dilution Ratio:

The product can be used straight away and doesn't need to be diluted.

### Instructions:

1. Clean and dry tires before using.
2. The agent should be squeezed onto the waxing sponge.
3. Make sure the tire surface is completely covered by applying the sponge evenly.
4. Just let it air dry naturally.

### Caution:

- **Keep out of reach of children.** In case of accidental contact with eyes or ingestion, rinse thoroughly with water and seek medical attention immediately.
- Do not store in high-temperature areas or under direct sunlight.
- This product may contain slight sedimentation, which is normal and does not affect its performance.
- This product is for industrial cleaning use only; do not misuse it.

**WARNING**

Tyre Dressing
